

Development map

The purpose of this site is to propose music in languages other than English. This due to the heavy free marketing english language music gets. The aim is therefor to diversify the scene. People who enjoy music are the primary target, while people learning a language can also benefit from this website.

User stories:

Function:

Person who likes music wants to find specific music

Scenario:

- * If I enter anything in the search field,
- * and my keyword returns a query from database,
